ICOSMOS

Smart Solutions for
Compliance, Risk and Cost Management

WHO WE ARE

iCOSMOS Corp., is an American integrator firm based in Washington DC, founded by an international group of senior qualified specialists in the field of Company Governance. iCOSMOS Corp. addresses the management aspects in providing worldwide a complete **Smart Solution for Compliance, Risk and Cost Management**.

Our Markets

Focus on both **institutional** and **commercial customers** belonging to **complex and heterogeneous industrial sectors**.

Sectors: machinery, carpentry/engineering, automation, oil & gas, defense, aeronautics, automotive

Industrial items: systems of systems, systems, sub - systems, equipment, parts

Company Levers

Long-term and exclusive partnership deals

Ability to value existing international networks

Organic growth

OUR SMART SOLUTIONS

Modules portfolio

SMART COST CONTROL

A **complete and integrated range of expert tools** capable of **monitoring** and **managing** the **entire workflow of cost estimations in a complex project**. The solution is designed to resolve standing issues around visibility, accountability and traceability for a better cost management. The key features of the solution enable client organizations to improve the implementation of their knowledge management.

SMART RISK CONTROL

The Risk Control Module **helps to ensure cost, schedule and performance objectives are achieved at every stage in the lifecycle**. Risks are interconnected and consequently their mitigation can be amplified. The Risk Module provides indications of additional costs, extension of project times and consequences on expected results, providing tools for the management of mitigation actions.

SMART COMPLIANCY

This module is **focused on reducing cost and complexity of compliance activities**. The customer can plan and document sustainable, repeatable and auditable compliance campaigns, and so follow the impacts of new and changing regulations on the organization. The compliance module allows to follow the requirements associated with industry standards and global regulations, in particular the GDPR.

Tools portfolio

EPICK™ BACKBONE

Compliance, risk and costing modules

Workflow & Database

Collaboration & web platform

Dashboard and reports

LEAN COST SUITE

LeanDesigner®

Design for Manufacturing and Design to Cost functions

3D CAD integration
